Telematics Exchange (TE)
Insite that drives performance

About
• Provides insurance companies personally identifiable telematics data to counter the erosion of performance and improve the profitability of their commercial auto portfolio
• Speed to market with this easy to use, single source telematics platform that can enable telematics driven insurance products
• Built in analytics to refine risk models, enhance policy pricing accuracy, develop custom insurance programs and increase customer acquisition and retention
• Increases the effectiveness of safety and loss prevention programs by identifying risky behavior and provide targeted, proactive loss control solutions to your insureds
• Provides the data and analytics necessary to sustain a competitive advantage in the commercial auto market

Key Functionalities & Features
• Technology agnostic, captures data from multiple telematics providers
• Automated, legally binding consent process to enable personally identifiable telematics data
• Robust, fully functioning data warehouse with full array of security and compartmentalization
• Dashboards for predictive analytics on the macro and micro level
• Customizable risk scoring and benchmarking to improve underwriting
• Data mining capabilities to find trends and discover high risk areas and activity
• Insured portal with dashboard scorecard to improve transparency
• White labeled portal to improve your brand
• Onboarding process for securing your insured's consent
• First Notice of Loss (FNOL) capabilities to flag trips that may have had a loss occur

Our Company
eTech Services is a technology solutions provider focused exclusively on the insurance vertical. eTech Services' strong domain expertise has allowed us to create customizable products that address both operational and client-facing business needs. These applications include data storage and output, underwriting analytic systems, risk and claims management activity trackers, and online-based training platforms. The goal of the eTech Services products is to streamline procedures, improve decision making processes, and drive results.
