

Insight that Drives Performance.

TE | TELEMATICS
EXCHANGE

Telematics-Based Commercial Auto Insurance Powered by the Telematics Exchange.

Increase ROI

- Personally identifiable telematics data to counter the erosion of performance and improve the profitability of your commercial auto portfolio
- Improve loss prevention and safety programs by influencing safer driving behavior
- Increase policy pricing accuracy through rating verification
- Understand the total risk profile of policyholders through underwriting
- Increase the speed and accuracy of the claims process with trip data

Customized Solutions

- Robust analytics to refine risk models, enhance policy pricing accuracy, develop custom insurance programs and increase customer acquisition and retention
- Customizable risk scoring and benchmarking to improve underwriting

Increase Speed to Market

- Integrated with over 50 Telematics service providers allowing policyholders to use the telematics platform of their choice
- Capitalize on a turn-key platform and focus on improving profitability through telematics insight, rather than expending resources on integration, analysis, and computing
- Powerful analytics that transforms data into functional insight for a competitive advantage

By 2025, fleet telematics will approach 100 million installed units globally.

-Ptolemus Consulting

Global Automotive Telematics expected to grow at 33.2% CAGR until 2023.
