- Detailed reporting and tracking tools that can be exported
- Regularly scheduled instructor-led webinars
- Multiple links in one location to provide access to the rules and regulations for industries
- Multilingual trainings
- Links to industry sites for easy access
- Certification trainings and courses are available

According to a Brandon-Hall Study, education through e-learning typically requires 40% to 60% less employee time than learning the same material in a traditional classroom setting.

The Research Institute of America found that eLearning increases retention rates 25% to 60%. With eLearning students have more control over the learning process as well as the opportunity to revisit the training as needed.
